

DRAGONS

Question Please, can you tell me if a dragon can be human and vice versa?

Answer: No human being has ever been a dragon, nor a tree, nor an animal. These are completely different levels of being, but they are no more or less than human beings, they are just different. Dragons are equal to you.

Question: Can you please tell me and explain if there is some dragons hierarchy because I have encountered such an opinion, although I do not think so, and I would like to know what the truth is?

Answer: It is difficult for me to judge the way of thinking of those human beings who are convinced of the hierarchy, because people see things differently, according to their level of knowledge or understanding. Some may perceive the hierarchy and some may not. Likewise, the realm of angels and archangels can be perceived as a hierarchy, although it is not there. The level of thinking of the human being as such is set to a hierarchy because in your society there is always someone superior and someone inferior. All mankind is hierarchical and so is your way of thinking. If a person knows and experiences only hierarchical thinking, his mind cannot imagine different reality as it doesn't have any record of it. The people think it can't be i.e. it doesn't exist. Therefore, the only way to understand it, is through altered state of consciousness, out-of-body experience etc. Without these limitations, you can experience another dimensions. You can see all those subtle matter beings such as angels, dragons, unicorns, fairies, elves, etc. that are usually not visible to human eye. But these beings exist, they are alive. If you lucky sometimes you might catch a glimpse of them, that is all. Their existence is veiled to you. They are close to you but on a completely different vibration level. It is the same as the human body, it has its subtle matter bodies - ethereal, astral, mental, etc., and you don't see them, yet they create your entire being.

All there is about you, what makes you, all the information are written in your subtle matter bodies. Through them you can perceive these other beings such as dragons. And physical body is only a form that enables you to live your life NOW and HERE. There is no hierarchy in dragons.

Question: Do I rightly perceive that we were flying on dragons when our bodies consisted also just from subtle matter?

Answer: Yes. Now it is not possible, because of your thinking as well as your physical body, is much more dense. It is burdened with the way of the life you live. In this stage of mankind, it is not possible to fly on dragons, but it's okay, because you are as you are, here, on purpose.

Question: Has any human being ever ruled over a dragon?

Answer: No. Dragons are beings of LOVE who have protected, protect and will still protect Mother Earth and not just her. You have worked with dragons and have always asked them to do what you needed or wanted, and they always agreed with you. Dragon cannot be bounded, however it is true that in the past there were some beings who abused the dragons and deceived them. As they are beings of Love and they see only Love in everything, they could not see the deception and in good faith they did what they were asked to do.

Question : During the life on Mother Earth, was the period when the dragons also had physical bodies? **Yes.**

Question : Did human beings have special skills to take Dragons life, to heal, cure or restore them?

Answer: Theoretically, yes, but it was only exceptionall because the dragons were not domestic animals. They lived far away from people in the high mountains. Only the people who lived in these mountains and were able to access them, and they did not harm them. They lived with them in harmony.

Question : So dragons are multidimensional beings? **Yes.**

Question : And do they dwell in multiple dimensions simultaneously? **Yes.**

Question : What happened to the dragon killed in the past by a human being?

Answer: The dragon knew where to go when they were dying. It's the same as wild animals do today.

Question : I mean, when the dragon was wounded in some fight?

Answer: They didn't die on a place where they were injured.

In the past, have there been farewell ceremonies and ceremonies to honor dragon's stay among people and what happened to his soul?

Answer: No, there were not. There was no one who would do that.

Question : How come, we could perceive a dragon that we knew for sure he was killed?

Answer: You sensed his soul and his energy.

Question : The dragon changed visually after death, but energetically, it was the same energy. For us, the change was beautiful and fine. We felt the love.

Answer: These beings live on other levels in a different form. It is the same as with spiritual beings.

Question : Please, can you tell me more about what the mission of dragons is on Mother Earth?

Answer: Dragons were beings that were created to protect Mother Earth, Life and Harmony of Life on Mother Earth. To accomplish this task, they were endowed with immense power, but also with a great and profound inner WISDOM.

This Knowledge was here, at a time when you were building your pyramids on Mother Earth in ancient times. You lived with dragons in Harmony and Love. They helped you, and you drew on their great Wisdom. You could benefit from their life wisdom that they gave to you with Love.

The civilizations that came from the Universe with the intention of taking control of Mother Earth and humiliating human beings, knew that, first and foremost, they needed to destroy Mother Earth's protection to come here. Therefore, it was first necessary to destroy the dragons. The dragons were the first to be attacked by these beings. Dragons were literally poisoned by their thoughts, the way of thinking, the way of Life and Being. Just as some people also some dragons allowed to be manipulated by them, they accepted their thoughts as own. So there was a fight among the dragons, which greatly weakened them. The dragons lost their inner strength due to this fight.

Then it was deliberately entered into the collective human consciousness that Dragons are evil beings, that they kill human beings, that they eat them, they spit fire and kill Life on Mother Earth. You can see it in fairy tales. Fairy tales are ancient memories of mankind, they are proof of how long ago, this has been brought into the collective human consciousness.

Therefore, it is now necessary to help dragons to clear their name and to change the collective human consciousness about dragons, their true role and mission on Mother Earth, because only if the collective human consciousness changes, they can regain their original strength.

Dragons feel joy from the fact that you have the Knowledge because you see their original beauty, wholeness, and therefore you need to send them a lot of Love, a lot of Forgiveness so that they can begin to heal themselves too and heal their pain, unforgiveness and feelings of guilt.

Many dragons are hidden in the depths of Mother Earth and, they cannot come out to God's Light due to feeling guilty. They live only in the darkness of their pain, the unforgiveness, and the feelings of the guilt they have created because they failed to protect Mother Earth. Even their feelings of failure are as great as yours. As you are able to heal your feelings of failure, guilt and unforgiveness, you can also help these beings with your Love so that they too can begin to heal their own feelings of failure, guilt and unforgiveness, so that they too can begin to perceive that the energy of LOVE - that of original LOVE - again returned to Mother Earth.

Question: How do dragons actually work?

Answer: Dragons work in different energy levels as well as in a material so in immaterial level. They are the guardians of Mother Earth and now they are in the immaterial level and are beings of LIGHT. But in those ancient times, they also had a physical form and a material body. There were many kinds and sizes, colours and they fulfilled different tasks. Not all dragons were suitable for living with human beings, and not all dragons were flying. Back then each of you had your dragon to fly with it. Some dragons worked as soldiers and they formed literally „fleet,, of soldiers to protect the area where you lived. Therefore, in medieval castles, the warheads are dragonheads, and this is a remnant of your memories that dragons protected you, it was their role.

A certain group of dragons helped Mother Earth within her life and seasonal cycle. They helped with the power of elements and cooperated with the elementals of nature and of the elements. They had access to Mother Earth's secrets and used to enter in the Earth and protect it.

Mother Earth as a planet is and has always been of interest of many other extraterrestrial civilizations from other galaxies but also from other universes, and they are interested in minerals and energy, created by beings living on Mother Earth and therefore the tasks that dragons performed on Mother Earth were various. The dragons fulfil those tasks also today, but they happen on that immaterial level. But immaterial does not mean that it is merely immaterial because when something is in that other dimension it does not mean that there it also has immaterial form, but it just means that YOU in this 3D dimension do not see it with your imperfect physical sight, but that does not mean that it does not exist. You perceive only a very small percentage of what is really going on.

Therefore, these dragons had an irreplaceable role in their tasks in those ancient times.

This does not mean that dragons died out as the dinosaurs on Mother Earth, they just evolved and regrouped, but today, they still exist and function just in other dimensions and levels. The life here and now on Mother Earth is already different from what it was before, and YOU are now different than when dragons had a physical body. You didn't live in 3D back then, but you lived in the higher dimensions, and the material level was also part of life. It is difficult to describe it because you cannot imagine it now, and there are no words to explain it to you so that you could imagine it.

Question: What were the dragons' relationships with each other?

Answer: There was no hierarchy of power in the concept of nowadays mind. Each group of dragons was different in sense of the performed task, but no one was superior to anyone.

There was EQUALITY between them, but it was at a time when EQUALITY was also among human beings. With the decay of human beings, so there was rivalry among dragons, and then there were dragons who stood up against the others.

With the decay of Atlantis, the space-time for dragons was damaged, that is, the time-space in which they functioned, and it did not happen all of a sudden, from one day to another. It took a very long time. The decay of some dragons happened over time and it took a very long time.

Dragons exist at certain levels just like unicorns and you can connect with them, but are no longer active on Mother Earth as they did during that material – immaterial era.

Question: Will the dragons return to Mother Earth in that im-material mass?

Answer: No, according to where the development on Mother Earth is heading, in an energetical sense, no, they will not return.

Question: Why did dragons sometimes attack humans and their homes?

Answer: There are different groups of dragons and therefore have different roles and focus. Rarely happened that a group of dragons, which originally was supposed to protect the territory, eventually wanted to destroy it. It was an atypical behaviour of dragons, but as there could be an aggressive group amongst human beings so it can happen with dragons as if their mission mutated in them and therefore became hostile to people and the whole territory.
