

# RESPONSIBILITY - part 1.

A silver rope came for me and a beautiful moon shone at its end.

The part of the silver rope that is next to me has a cradle at the end that I can lie in, so I lay in that cradle. The silver rope took me to a distant planet in the Universe where I perceived several beings.

I feel that they are much higher than human beings today. They are about 3.5 to 4 metres high. They are wearing long coats. As far as hair is concerned, they have different colours and are long and short. Coats seem to be a golden colour, but maybe it's just their energy expression. The golden colour is not like the brocade, it is really energy expression of those beings, that is transferred into the coat.

All of a sudden I knew that I was looking at these beings who were preparing a stone with a written message about Earth, in order to send it down to Earth and they will then come to Mother Earth to teach the message written in that stone. They did it to remember what they wanted to teach human beings so that Knowledge in the form of the written message would be recorded in the stone.

These beings were preparing themselves consciously to enable CONSCIOUS LIFE to be born on Mother Earth - as a planet that was created to have life on it - just as it was born on this distant planet where they live.

It is strange for me because I perceive and know that life on this distant planet developed freely until it got where it is now, i.e. the time that is shown to me, where I see these beings who prepare and write the message as Knowledge in the Stone that they brought to Mother Earth.

They brought the stone to Earth because they wanted to keep the development on Mother Earth free, but at the same time, they brought it for themselves so they could remember the message later on.

To be able to write this message as Knowledge into stone, they also had to undergo free development on this distant planet.

I am just looking from the cradle attached to the silver thread how they advise on how to do it, to be part of the stone so that they can read it when the time is right, and we - human beings will be ready for the Knowledge on Mother Earth.

**What I am saying is that LIFE is not a random process, but a CONSCIOUS DECISION.**

It is shown to me because we should realize it.

The evolution of life on Mother Earth was not a random process, but it is a conscious decision of beings.

**The essence is that life on Earth is a CONSCIOUS DECISION of an intelligent being - the CREATOR who has made it all.**

Just as life evolved on other planets, the conscious beings have CONSCIOUSLY decided and CONSCIOUSLY enabled the creation of intelligent life on Earth, where it was indeed transferred.

Life has not evolved accidentally in the form as WE perceive it is on Mother Earth today.

**Mother Earth is also a CONSCIOUS and INTELLIGENT being, and she also creates CONSCIOUSLY the DIVERSITY of LIFE on herself.**

She creates it with the intention with which she, as a conscious and intelligent being, was born.

We can imagine the intention as a program with which we program something, and then that part, that machine, or that device works with the program. But if it is just a machine that is programmed then it only works within that particular program.

**However, Mother Earth is not only a machine, she is a living being, and therefore she has also her CONSCIOUSNESS and FREE WILL and therefore she has the right to make free decisions and can change this program herself while keeping the original intention.**

**And she acts this way because she has in herself the RESPONSIBILITY and it is inseparable, integral and indivisible part of her.**

**Mother Earth has accepted free will, but at the same time, it has also accepted the RESPONSIBILITY that comes with it. Therefore, she is able to make decisions and change the program so that the original intention is preserved.**

**The original intention is to develop a conscious life in Love on Mother Earth. Mother Earth was born with this intention.**

**And Mother Earth is giving birth to all her children for this purpose.**

**All forms of life on Mother Earth have this original intention encoded in them and therefore all forms of life and all human beings are born out of Love and have within them the energy of Love encoded in their DNA, not just human beings, but every form of life on Mother Earth. DNA is the carrier of this intention.**

And on Mother Earth in the history of its evolution, countless forms of life and civilizations lived, and if they violated this fundamental intention and principle, these civilizations destroyed themselves or were destroyed.

**And Mother Earth can restore itself and heal itself in such a form that it will once again offer space on its surface so that the conscious life can return to Mother Earth and develop itself in Love.**

And oftentimes on multiple places on Mother Earth, this conscious life in the form of various civilizations existed. Some civilizations have left many traces behind, and some have disappeared without traces. Many of these remains have merged with the surface, so you could not see them for a long time, only today, with advanced science, are you beginning to discover them.

And know that in these monuments, their wisdom, their knowledge and their experience is recorded and stored. If you learn to read it and accept the Knowledge they bring to you, you can avoid many mistakes they have made, overlooked and overcome with during their past development.

**And so you can change the direction of your society's development towards LOVE.**

**The space on Mother Earth that she offers herself is given for development in LOVE, with LOVE and for LOVE.**

This is important for yourself to realize it.

Because if you lose Love in your society, and if fear will predominate and if its attributes will predominate i. e. greed, envy, meanness, superiority, arrogance, and above all, recklessness with which you are starting to act toward Mother Earth and yourself, then you will destroy yourself by this greed, envy, meanness, arrogance and recklessness.
