

RESPONSIBILITY – part 5.

TREES are conscious and intelligent beings, they work and provide for you and they do it CONSCIOUSLY.

They are intelligent beings who have consciousness and knowledge.

They as well as YOU human beings can create social communities where they help each other and support one another, where they can consciously sacrifice one another. And they do so with love and consciously to preserve life as such.

They understand their mission and have a profound sense for life on Mother Earth and act consciously for the development and benefit of life.

It is not just the mindless wood matter that is here on Mother Earth to serve and fulfil the needs of you, human beings.

This idea has been deliberately implanted in you, to lose respect for these beings in your society, and to stop seeing your interconnection and to omit the fact that you are creating conditions for one another to live here on Mother Earth.

And again, you need to start from yourself.

You need to begin to appreciate and honour all the plants and trees that grow in your gardens and that you have planted and let them grow into huge trees because only then they begin to fulfil their mission on Mother Earth.

You, however, are cutting down the trees that have grown in your gardens, because they are too large, and instead of them you plant small trees that do not have those large branches and a lot of leaves.

And because you do it YOURSELF on a small scale, your society does it on a large scale. And again, the Cosmic law is up and down, both in large as in small, and both inside and out.

And although you are angry that your society does not appreciate trees that grow in the woods and these trees are cut and put down, YOU treat the same way the trees that grow in your gardens.

And so we got to the same point again, because if you want something to change in your society, you have to change it first in yourself.

So the respect for the trees in your society will come only when each of you shows respect for the trees you have in your gardens.

And that's because everything is related to everything.

You cannot expect human society to show respect to the world globally when you do not manifest it YOURSELF. Human society is an image of you, of what is inside of you.

Therefore, whenever you do not like what is happening in your society, first look inside of you, what you need to change first and foremost within yourself.

RESPONSIBILITY is the alpha and omega for preserving life on Mother Earth.

You have not been able to accept your responsibility because you have experienced great pain in many civilizations due to the loss of life, the loss of the possibility of living your life in Love here on Mother Earth.

And it is due to this failure to take responsibility that you pass in your cells over and over from generation to generation.

And it is a vicious circle because only after you accept this Responsibility, you can live and renew life in Love here on Mother Earth, without the immense pain that you carry around and over again.

It is the foundation of life on Mother Earth, so it is very important that you are able to consciously understand it and accept it as part of your cells and DNA.

And you can only change what you have accepted.

And now I'll go back to that stone.

The stone they brought to Mother Earth has the shape of an isosceles cross because it expresses balance, equality, inner peace, reconciliation, harmony and acceptance.

And this expresses life in accordance with the Universal Laws, where through the equality of all beings living on Mother Earth, a new life is created in unity through devotion and acceptance in equality.

It is the principle of LOVE, the sacred Love from which LIFE is born and renewed in UNITY. The UNITY is created by different but absolutely EQUAL beings, namely MAN and WOMAN, or WOMAN and MAN, because they are EQUAL, absolutely EQUAL .

The message engraved in the centre of the stone is written in a square, in which inside it has four smaller squares that stand for:

The four levels of the human being - the physical body, the etheric body, the astral body and the spiritual body.

The four elements that work on Mother Earth — earth, fire, water, air — that bring together life into the matter on Mother Earth.

The four cardinal direction - east, south, west, north.

The four limbs of a human being, two legs, so that human beings can walk together and two arms to hug each other in love.

You will learn this when you understand how they work and how the Cosmic laws work. These are the laws of Love, the purest, all-encompassing, unconditional, limitless Love, from which the entire Universe and Mother Earth have been created as a place where there are the same conditions for everything living and everything living is absolutely and without condition EQUAL to each other.

You need to understand that RESPONSIBILITY is a necessary condition of life, but LOVE is a sufficient condition of life because when you have LOVE within you, LOVE also comes with RESPONSIBILITY.

LOVE CREATES EQUALITY.

LOVE CREATES INNER PEACE AND SOLITUDE.

LOVE CREATES RECONCILIATION.

LOVE CREATES UNITY.

LOVE CREATES HARMONY.

LOVE CREATES FREEDOM.

LOVE CREATES APPRECIATION AND HUMILITY.

LOVE CREATES COMPASSION AND RESPECT.
