

HIGHER PRINCIPLES OF COSMIC LAWS - Part 2

Notice now that fear has strengthened its position in this way so strongly that many communities and states enacted insurance law in your human society.

Thus, even if you become conscious beings and realize the way fear affects Mother Earth and human society, you are bound by the laws of human society and you cannot freely choose not to sign these insurance policies because you would violate your human laws.

And so, due to fear of being punished by your legal justice system, you will become part of this closed circle by which fear strengthens its position in your society.

And so all of you, not just individuals, but also states and society as a whole, act as fear allows you to. And this happens precisely on the basis of the energies that influence your actions, decisions, or thoughts from your subconscious levels of your being.

Nowadays, the effect of fear in your human society is very strongly anchored. And it has found many paths through which it manipulates your society.

And that's because your society lives on Mother Earth in duality. And just as fear strengthens its position on the one hand, on the other hand, the energy of Love, which has been working on Mother Earth since the beginning of being, increases and grows.

And in order these energies remain in BALANCE, the vibration of Mother Earth increased and the Earth was blessed with the energy of Love which comes to Mother Earth to a much greater extent.

You have received this gift of the energy of Love, as human beings, precisely to be able to transfer these energies of pain, unforgiveness, feelings of guilt, failure and unworthiness from your subconscious levels to your conscious levels because only there on the conscious level, once you can accept these energies, you can process them and dissolve them in the Love of Forgiveness.

And this is because when fear attacks Mother Earth and tries in many and many ways to strengthen its action on Mother Earth and in order to maintain the BALANCE which acts as a higher principle of the Cosmic Laws, the action of Love on Mother Earth must also be increased.

And since the energy of fear on Mother Earth is created and multiplied by YOU, yourself, as human beings, you also receive in your hands a tool by which you can dissolve these energies of lots of pain in the Love of Forgiveness and thus get these opposing energies into BALANCE. If you were not given this tool and this Knowledge of how you can dissolve these energies of pain in Love from the subconscious levels of your being, then fear, pain, unforgiveness, hatred, anger, rage, envy and greed would destroy LIFE on Mother Earth.

And it has happened so many times in the past, and that is why, through these messages, I pass on to you this guide on how you can restore Harmony, Balance, Peace and Serenity in yourself, in your society and on Mother Earth.

According to the Law of Conservation of Energy, since YOU, as human beings, create these energies of pain, unforgiveness, fear, and feelings of the guilt, then, only YOU can change that by transforming these energies into LOVE through FORGIVENESS.

Question: Many times, however, I have heard the opinion that when we process our pain which we feel in ourselves, we should only solve it HERE and NOW and we should not go into past lives but only in this life. According to the Law of Conservation of Energy, however, these energies from the emotions that we created and that we did not process in our past lives, influence us from at the subconscious levels and then we act and we do not even know why we did it so. However, if we do not accept these energies and emotions and we are not even aware of them, then according to the Law of Conservation of Energy, we cannot even cure and heal them, right?

Answer: You solve it HERE and NOW but the problem stems from that past and if you can't find the roots and causes it comes from, you'll only heal the part that's in this life that you see because your consciousness – i.e. the memory, it is what realizes to you - that means, it will be solved just on that particular level.

If one goes into those deep records into the subconscious levels, one will understand the essence and those roots.

And people who say it's not necessary, they just choose the easier path because they're not willing to confront their past or don't believe it exists.

They are attached only to this life and to what this life brings.

They are not aware of their multidimensionality and all levels of their being.

It is not a contradiction between the conscious being and sorting out the past. Just because someone lives consciously does not mean that past has no influence in his life because, without the past, there would be no present nor future.

And as future unfolds from the present lives, so the present unfolds from the past. It is all interconnected, it can't be left out. Just as the Cosmic Laws work together.

By losing the Knowledge of how the Cosmic Laws work as individuals and society as a whole, you are acting more and more against them but it is through this action against the Cosmic Laws and that is the laws of LOVE, LIFE and BEING, that you are acting against yourself, acting against your essence. You imprison yourself by taking away the gift of FREE WILL, taking away the gift of DECIDING FREELY and thus creating an immense amount of pain in yourself, in society as a whole and on Mother Earth.

And fear in your society has found many systems, created many circles into which you have been drawn and you have not even noticed and realized how fear creates an immense amount of pain and suffering in a particular circle or in a particular system.

It has turned into a huge big business which is now about fear and money.

Another of these closed circles that fear has entered into, is your healthcare system which has gradually, as it has allowed money to control it, lost its sacred goal with which it was created, which is to restore the health of people in their lives and thus restore their joy of life.

And I'm not talking about individuals here but about the system as such.

At present, the health of the entire population is being deliberately and consciously damaged, and only for the purpose of having to come and ask for help, to restore their health, which, however, was deliberately and purposely damaged.

There is an unimaginable amount of money in this system of those groups of human beings who have understood that through pain and suffering they can control you as easily as possible and thus the original sacred mission is lost and money has become the new „god,, of this whole system.

And money is made by keeping a human being sick for as long as possible.

Many drugs, an unimaginably large number of drugs, intentionally contain substances that disrupt and damage your immune system and, with their side effects, damage your internal organs and impair brain development of many children and disrupt their immune systems.

That is why there is so much suffering in this whole system and that is why more and more people are sick because the effort to restore people's health has been lost and it is its desire to make as much money as possible.

By creating so much suffering and pain at the level of the physical body, the human being cannot find the inner strength or the will to look at the original cause of his pain and illness from a different perspective, to be able to find the essence of his illness and thus to look for the spiritual cause of his sickness. And then this human being can not realize the energy stored on subconscious levels in his consciousness and work with Love there, accept them and dissolve them in the Love of Forgiveness, but on the contrary, he creates more and more pain that comes from the suffering which he experiences in his physical body.
